REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Note that, Applicants's arguments presented in the Appeal Brief are sufficient to place the instant claims in condition for allowance. Of the references of record, the most pertinent is WO 95/00117. '117 teaches a liquid detergent composition comprising a branched anionic surfactant. The compositions are low sudsing and have improved hydrophobic greasy soil removal performance. See Abstract. These surfactants are described in detail on page 3, lines 20-60. However, note that, '117 teaches that the surfactants may contain linear or branched alkyl groups and there is nothing in '117 which would point, motivate, or direct one of ordinary skill in the art to formulate an anionic surfactant having 20% to 60% branching as recited by the instant claims.

None of the references of record, alone or in combination, teach or suggest a detergent composition containing water, magnesium ions, an alkyl alkoxy sulfate surfactant having 20% to 60% branching, an amine oxide, and the other requisite components of the composition in the specific proportions as recited by the instant claims. Accordingly, since the prior art fails to teach or suggest such a composition as recited by the instant claims, the instant claims are deemed allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
